

AME FLOWT® TECHNOLOGY

Full thickness, non-powered advanced wound care therapy mattress system. Micro-conforming distribution system with 130 interconnected air cells. 4 zones of 35 air cells are customized to optimal pressure distribution for each body zone. Air cells react immediately to any slight patient movement to provide continuous pressure redistribution.

Air exchanges and circulates between cells to manage moisture. Waterproof, breathable, four way stretch top cover allows for full immersion without resistance. 3" multi-density base layer adds safety and comfort. Middle layer waterproof barrier to protect base layer from contamination/odors.

Key Product Features

- Non-Powered Therapy
- Stage I-IV Treatment Level Therapy
- Addresses Both Pressure & Shear Forces
- Increased Patient Comfort
- Functional for P.T. & Rehab
- Patient Safety & Fall Prevention
- Waterproof Top Cover
- Low Air Loss (Optional)
